THROAT PASTILLES (HARRODS')
sold in boxes as illustrated at 0/9 each.

The basis of Harrods' Pastilles is composed of a special Pate de Jujube, which is soothing and palatable, while the local action of the incorporated drug is made more certain, by the slow rate of solution of the Jujube in the saliva, than is the case with ordinary Lozenges and Pastilles.

HARRODS' DISPENSING DEPARTMENT

Telephone: Western One.
80 lines.

This department is under the supervision of a highly-qualified Chemist, holding the Diplomas of the Pharmaceutical Society and the Fellowship of the Chemical Society, assisted by a Staff of Qualified Dispensers. All prescriptions are dispensed with the utmost care and accuracy, and all medicines are twice checked before being sent to the customer. . . . .

The charges for dispensing are 25 per cent. lower than the usual retail prices, thus combining economy with efficiency. . .

It is advisable that orders for this department should be sent so as to arrive as early in the day as possible, as the time required for dispensing varies considerably according to the nature of the compound and to the number on hand.

Upon every description dispensed, as also on each label, and on the envelope returned with the medicine, will be found a number and letters, which refer to an exact copy in the Prescription Books, therefore when a repetition is required it is only necessary to quote this number.

When Medicines are ordered in other than the sender's name, the original name on the prescription should be quoted.

Medicines are sent to the Country Carriage Paid to Destination.

"No mistaking good soap when you see it—and smell it. Goodwin's!—umph! Looks good—perfume delightful—and I'll be bound the lather's right, too. And 33 varieties of the one soap! Why haven't we hit on Goodwin's before, chopping and changing as we've been doing for years? Twelve tablets for 1/10—twelve? You don't say so? Marvel how they do it at the price! But we won't worry about that—let's get a box or two in from Harrods, and try the perfumes one by one!"

HAIRDRESSING SALONS

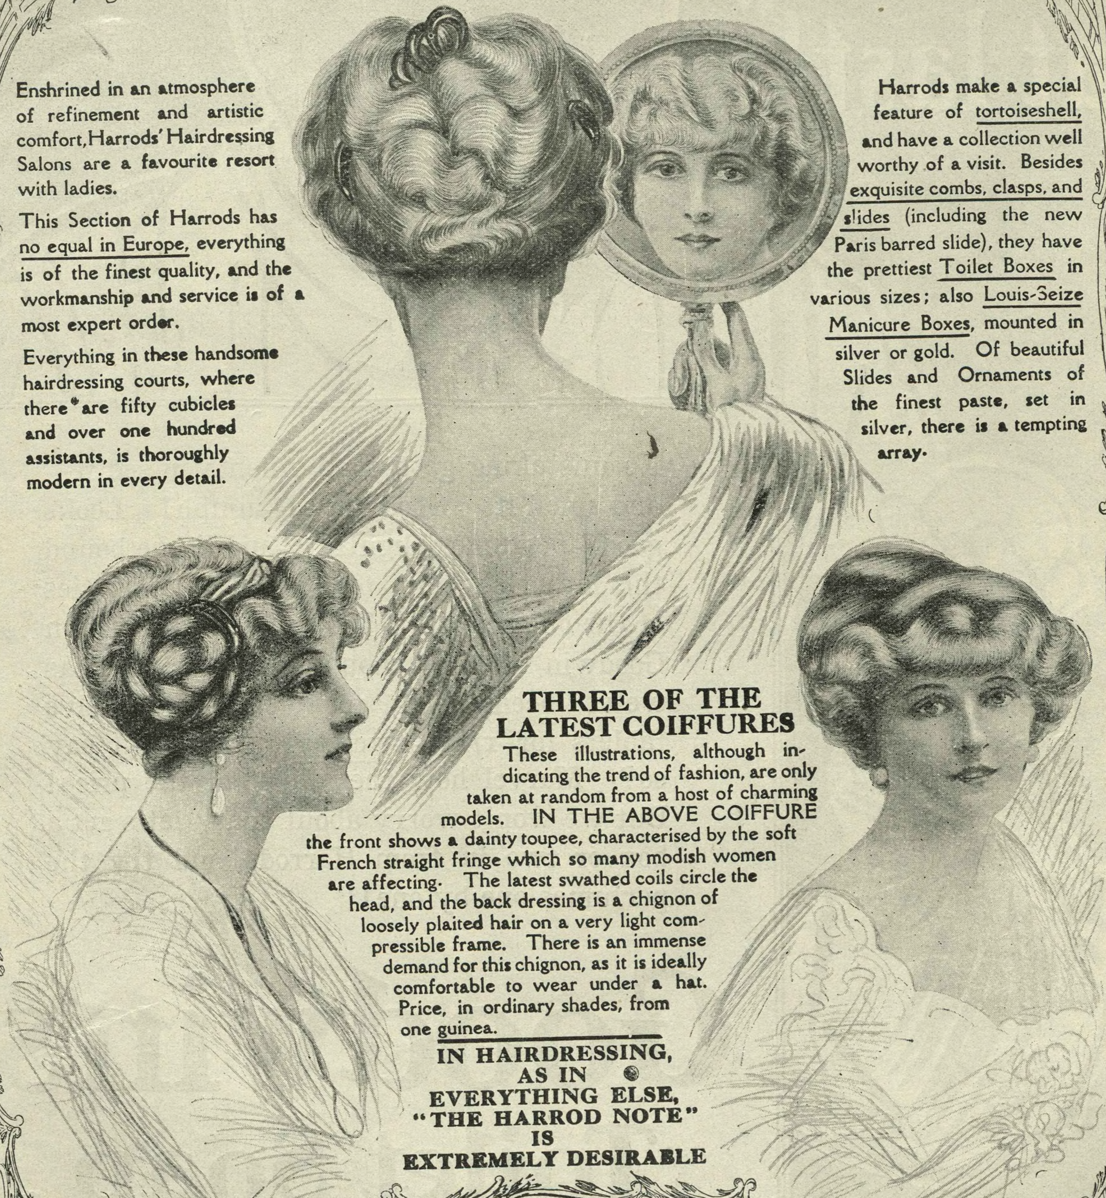
MANICURE, MASSAGE AND CHIROPODY.

Enshrined in an atmosphere of refinement and artistic comfort, Harrods' Hairdressing Salons are a favourite resort with ladies.

This Section of Harrods has no equal in Europe, everything is of the finest quality, and the workmanship and service is of a most expert order.

Everything in these handsome hairdressing courts, where there are fifty cubicles and over one hundred assistants, is thoroughly modern in every detail.

Harrods make a special feature of tortoiseshell, and have a collection well worthy of a visit. Besides exquisite combs, clasps, and slides (including the new Paris barred slide), they have the prettiest Toilet Boxes in various sizes; also Louis-Seize Manicure Boxes, mounted in silver or gold. Of beautiful Slides and Ornaments of the finest paste, set in silver, there is a tempting array.



THREE OF THE LATEST COIFFURES

These illustrations, although indicating the trend of fashion, are only taken at random from a host of charming models. IN THE ABOVE COIFFURE the front shows a dainty toupee, characterised by the soft French straight fringe which so many modish women are affecting. The latest swathed coils circle the head, and the back dressing is a chignon of loosely plaited hair on a very light compressible frame. There is an immense demand for this chignon, as it is ideally comfortable to wear under a hat. Price, in ordinary shades, from one guinea.

IN HAIRDRESSING, AS IN EVERYTHING ELSE, "THE HARROD NOTE" IS EXTREMELY DESIRABLE

The natural hair sold by Harrods is capable of the same manipulation as growing hair, and looks equally attractive.

Orders and enquiries by post promptly and carefully attended to.

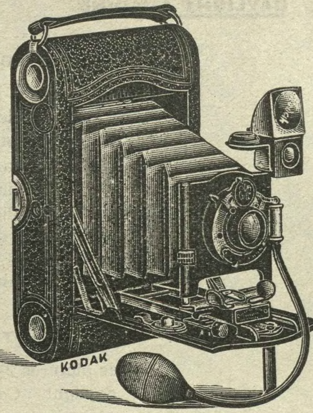
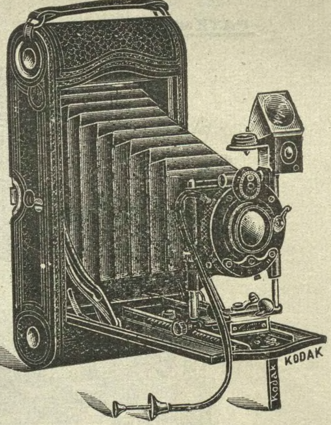
THE No. 1 and 1A FOLDING POCKET KODAK.



THE No. 3 and 3A FOLDING POCKET KODAK.



THE No. 3 and 3A SPECIAL KODAK.

THE FOLDING POCKET KODAKS.

The Folding Pocket Kodaks take Kodak non-curling film, and may be loaded and unloaded in daylight. They are very light and portable and yet have all the movements necessary to high class photography. They are exceedingly simple to use, and the lens and shutter equipment is of such excellent quality that good work can be done with these Kodaks by the beginner. They can be fitted with an Anastigmat lens if desired; prices on application.

	No. 1 takes pictures 3¼ × 2¼ in.	No. 1A takes pictures 4¼ × 2½ in.	No. 3 takes pictures 3¼ × 4¼ in.	No. 3A takes pictures 5½ × 3¼ in.	No. 4 takes pictures 5 × 4 in.

THE SPEED KODAKS.

These Kodaks are of Folding Pocket Kodak type, but are specially suitable for high speed work. They are fitted with a focal plane shutter giving various exposures up to 1/1000 second. The No. 1A Speed Kodak takes a picture 4¼ × 2½ in. and the No. 4A Speed Kodak takes a picture 6½ × 4¼ in. These Kodaks can be fitted with lenses to suit the taste of the user.

THE No. 3 AND No. 3A SPECIAL KODAKS

These Kodaks have been introduced to meet the growing demand for a Folding Pocket Kodak fitted with an Anastigmat lens and a shutter of the highest quality. Excellent as are the rapid rectilinear lenses furnished in the regular Folding Pocket Kodak equipment, Anastigmat lenses have a larger aperture and considerably widen the possibilities of photography. The 3 and 3A Special are supplied fitted with Zeiss Tessar, Cooke Series III. or Goerz Dagor lenses. To give the full advantage of these lenses, they are also fitted with a "Compound" shutter giving a range of instantaneous exposures up to 1/200 of a second, as well as time exposures. The No. 3 Special and No. 3A Special Kodaks have a rack and pinion for focussing, and a double focussing scale, one for films and one for plates. These models are covered with black Persian morocco, and have black leather bellows. The No. 3 Special Kodak takes a picture 4¼ × 3¼ in., the No. 3A Special takes postcard pictures, 5½ × 3¼ in., and both fold up in the same compact form as the Folding Pocket Kodaks.

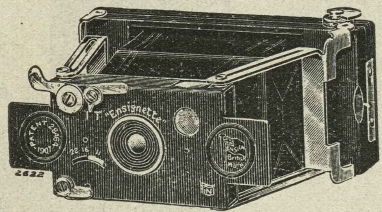
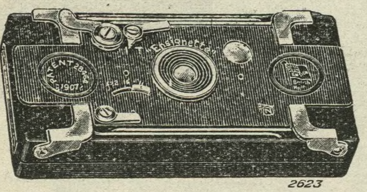
THE "ENSIGNETTE."—A FOLDING CAMERA FOR THE VEST POCKET.

PATENT. **DAYLIGHT LOADING.** **BRITISH MADE.**



OPEN.



CLOSED.

When off for your holidays don't forget
To slip in your pocket an "Ensignette."

The "ENSIGNETTE" No. 1.

With this little Camera anyone can take good pictures right away. No previous knowledge of Photography is needed. The "Ensignette" takes up no more room in your waistcoat pocket than a box of wax vestas. Always ready for use and never in the way. Indoor Portraits and Views can be taken, as well as Instantaneous Pictures. A brilliant view finder, built into the Camera, shows the Picture in miniature. The "Ensignette" is made of metal, oxydised black. It has leather bellows, a fine lens, an instantaneous shutter for snapshots.

The No. 1 "ENSIGNETTE."

Takes pictures 2¼×1½ inches, on Roll Films, and loads in daylight. Complete in limp leather case. Price	**30/-**

No. 2 "Ensignette" Films, 6 exposures, **1/-** each.

The "ENSIGNETTE" No. 2.

A similar Camera to the No. 1 "Ensignette" and constructed on similar lines throughout. Its value is far greater because the size of the picture is much larger and measures about 3×2 inches. The detail of the picture is much easier defined, and although the Camera is somewhat larger it will still fit into the waistcoat pocket.

HARRODS' DAINTY REFLEX for Plates and Film Packs, 3½×2½ inches.

This beautiful little instrument removes the only objection that can be urged against the "Reflex" type of Camera—that of size. It is light, small and compact, beautifully finished, of the highest efficiency, with all movements and fittings for turning out the highest class of work—a veritable Camera-de-luxe. Ladies, travellers, cyclists, motorists, all those to whom a small size is a desideratum, will find this camera all that can be desired, retaining as it does all the advantages of the "Reflex" system. The pictures obtained are capable of enlargement to any desired size if required—the whole outfit being of a quality that ensures sharp, crisp, perfect negatives. The adjustments are simple, and the Camera can be used with dark slides, changing box or film pack adapter.

The No. 2 latest New Model has reversing back, square focussing screen, rising front and ducking motion of the mirror.

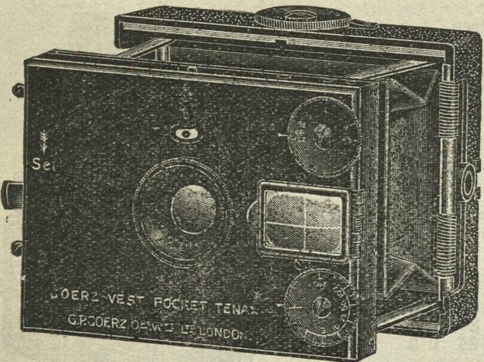
HARRODS' "GOERZ" CAMERAS.

GOERZ VEST-POCKET TENAX.



Taking plates or films 4½ × 6 cm. (1¾ × $2\frac{5}{16}$), the Vest-Pocket Tenax is a thoroughly practical little instrument. It is fitted with a shutter, giving speeds from 1 to 1/250th sec. and the Goerz Lens and focussing adjustment Owing to its size and construction the beginner in photography is able to obtain excellent results right away. The results are of surprising sharpness, and although contact prints can of course be made, most of the users of the camera will adopt the Vest-Pocket Tenax enlarger, by which prints up to 7 × 5 can be produced with the same ease and facility as direct prints, and with practically equal sharpness.

The Goerz Vest-Pocket Tenax can also be used either as a focussing or as a fixed focus camera.

The C.D.V. Tenax Camera is exactly similar, but takes plates or films 3½ × 2½ ins.

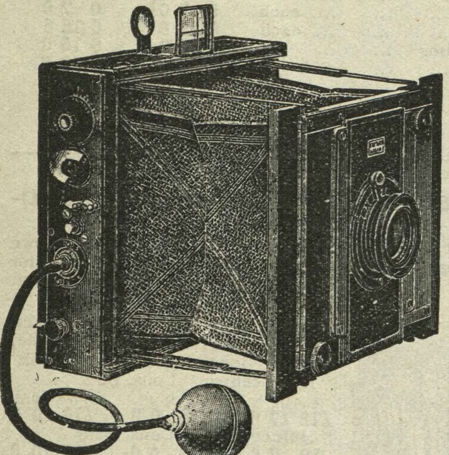
GOERZ-ANSCHUTZ FOLDING CAMERA.



The latest model of the Goerz-Anschutz Folding Camera is fitted with an improved form of focal plane shutter, giving speeds from 1/1200th second to 5 seconds, all regulated from the outside.

The shutter is self-capping, so that the plate or film is not exposed during setting. Exposures can be altered before or after shutter is set.

The camera can be fitted with Telephoto Lens and extension for use of Single Combination of Lens.

The best camera for all rapid, instantaneous and sporting pictures.

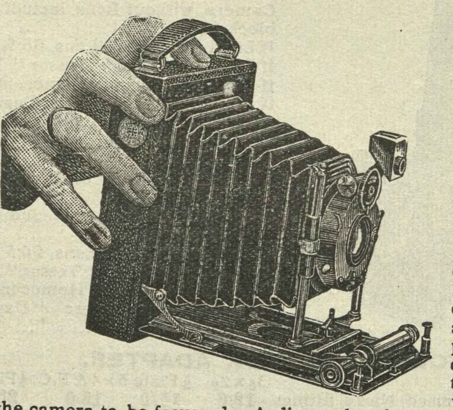
GOERZ TENAX CAMERAS.

"Manufoc." **"Autofoc."**

The Small, Practical Camera. No Larger than the Hand.



These are folding hand cameras built to the irreducible minimum of size. Elegant in appearance and beautifully made, portability has been obtained without a sacrifice of efficiency. The Cameras are fitted with a Goerz Lens, and a special compound shutter giving exposures from 1 second to 1/250th of a second, as well as time and bulb exposures. The double extension is sufficient to enable objects within a few feet of the camera to be focussed. A diagonal rack and pinion is provided for focussing, and the finder closes up in the camera. Fitting for tripod both ways. The "Pocket Tenax," although so small and simple in use, is as complete as a stand camera, and capable of overcoming every photographic problem.

"Autofoc" Model is Automatically Focussed for Infinity.
One Press of a Push Button and the "Autofoc" is Ready for Use.
"Manufoc" focusses in the ordinary way.

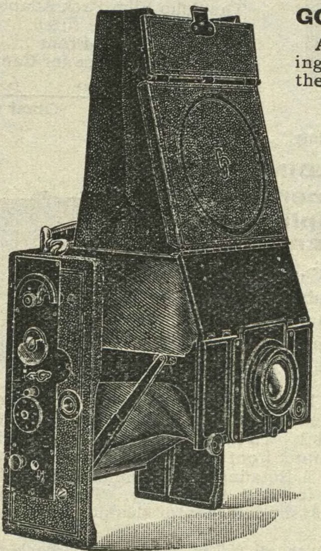
GOERZ FOLDING REFLEX.



A new type of instrument embodying the advantages of the reflex with the portability of the folding camera.

The Goerz Folding Reflex is made for one size of plate only—the popular 5 × 4. When folded the depth from back to front is 3⅜ ins. only. Simply lifting up the lens panel opens and extends the camera with the lens focussed and the mirror and hood in position, ready for use. One movement only is required. Closing the camera is effected with similar facility.

The camera is not fragile, but when set up is as rigid as the box-pattern Reflex. It has all the advantages of the latter and differs from it only in being compact and light enough to carry without inconvenience.

A Focal Plane Shutter—the latest self-capping Goerz-Anschutz pattern, giving time and bulb exposures, as well as automatic and instantaneous exposures, from 5 seconds to 1/1200th second—is fitted.

The picture can be seen right up to the moment of exposing.

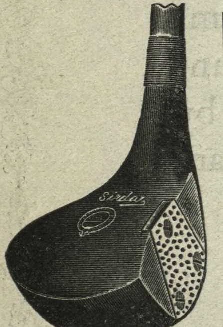
The "SIRDAR" and "RANELAGH" Wood Clubs, Ladies' or Gents'.

Every Head is made of the Finest Persimmon or Dogwood and every Shaft is selected from the choicest growths from the best seasoned Hickory. Grips are made of specially prepared Cloth and Leather. The "SIRDAR" Clubs are fitted with the new Miralite Face, the "RANELAGH" with fibre Faces, and are the most Perfect Clubs ever made.

The "SPECIAL" Wood Clubs.

These are our second grade Clubs, and are produced with equally great care in selection and choice of material as our "SIRDARS" and "RANELAGHS," except that the finish is not carried to so high a stage of perfection. For durability and quality they are second to none.



SIRDAR Brassies.

Logan's Irons. Almost the only new kind of Iron Club that has established itself lately is that of the "Genii" pattern, which has less heel than the ordinary Iron Clubs. It is undoubtedly a good thing, and has made much difference to the iron play of hundreds of golfers.

Mills' Aluminium Clubs.

Are impervious to wet and practically indestructible. Will not rust nor alter balance. Will play all the strokes that can be played with Irons, and are much easier to play with. Aluminium Spoons have a greater resiliency than iron. Wonderful Clubs for Long or Short Distances.

ADVANTAGES.

Combine all the advantages of Wood Spoons without their disadvantages.

There are no parts to come loose, such as horn, etc.

Perfectly balanced and true.

The ball will not skid from face.

Inspires confidence.

The "F. Murray" Irons.

Shortly described, the heads are forged in the ordinary manner, but with perfect blades, part of the socket is then ground away to permit of an insertion of a piece of wood — which when rendered flush enables the shaft to be added by splicing—as will at once be seen—a unique and ingenious method of uniting an iron head to shaft; finally (after gluing), firmly bound with whipping — result, the perfect combination, partaking as it does of both iron and wooden club. The feel of the club is what all golfers have been looking for. Made in Cleeks, Irons, Mashies, and Putters, **6/6.**

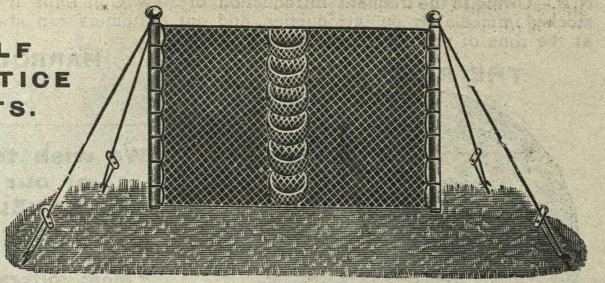
B.

GOLF PRACTICE NETS.



The very best cord and workmanship are used in our hemp nets, which are made in a special manner so that when the ball strikes the net it easily recedes, lessening the force of the impact and thereby relatively increasing the strength and durability of the net.

These nets are now made in ¾-inch mesh instead of 1 inch, and are guaranteed to stand fair wear and hard driving.

LEVY'S GOLF BALL MARKER.

This marker supplies the only effective means of marking Golf Balls for easy identification. Without damaging the ball it sinks the name or initials into the cover. They may be stamped either with or without colour, and cannot be removed without destroying the ball. The marker pays for itself in a very short time in the return of "lost" balls. Named they are useless to any but the rightful owner, and when found are invariably returned to him.

TENNIS POLES.

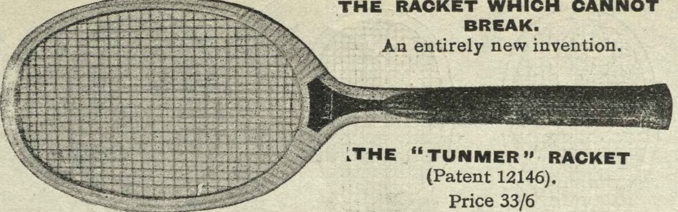
Warping impossible, can be perpetually re-strung.

Frame consists of one continuous ring of Ash.

Made of the very best selected materials, of perfect appearance, finish and design, and constructed under the new patent process, which entirely obviates the necessity for a press.

THE RACKET WHICH CANNOT BREAK.

An entirely new invention.



THE "TUNMER" RACKET

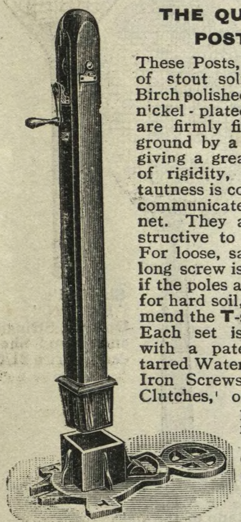
(Patent 12146).

Price 33/6

Absolutely guaranteed.

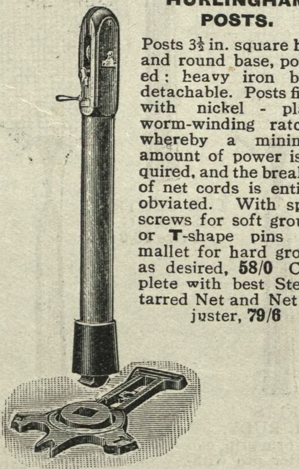
The only racket produced with a four-ply continuous frame.

Official trials show that whilst an ordinary first-class racket breaks under a strain of approximately 170 lbs., the "Tunmer" satisfactorily withstood a strain of 450 lbs. before the effect was noticeable.



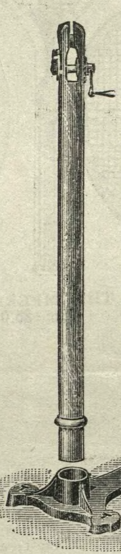
THE QUEEN'S POSTS.

These Posts, which are of stout solid Ash or Birch polished, and have nickel-plated fittings, are firmly fixed to the ground by a spiral pin, giving a greater degree of rigidity, and more tautness is consequently communicated to the net. They are not destructive to the grass. For loose, sandy soil a long screw is requisite; if the poles are required for hard soil, we recommend the **T**-shape pins. Each set is furnished with a patent Steam-tarred Waterproof Net, Iron Screws, Spanner, Clutches, or **T**-shape pins and mallet, and Centre Guide complete, **70/0** Price, Poles only, **50/0**



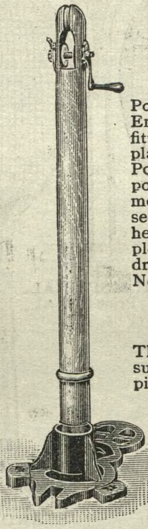
THE HURLINGHAM POSTS.

Posts 3½ in. square head and round base, polished: heavy iron bases detachable. Posts fitted with nickel-plated worm-winding ratchet, whereby a minimum amount of power is required, and the breaking of net cords is entirely obviated. With spiral screws for soft ground, or **T**-shape pins and mallet for hard ground as desired, **58/0** Complete with best Steam-tarred Net and Net Adjuster, **79/6**



THE "RANELAGH" POSTS.

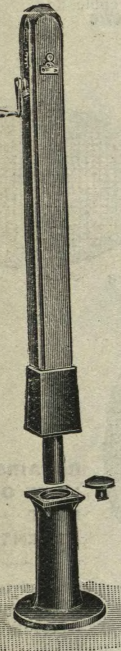
The "Ranelagh" Posts are 2½ in. in dia., with Brass wheel at top, and Brass ratchet. They are fitted with strong iron feet secured to the ground with **T**-shaped pins. The Posts are portable, and are easily removed from the iron feet. Complete with Steam-tarred Net, Copper Wire bound, and Net Adjuster, **42/6**
Posts only, **27/0**



THE ROEHAMPTON POSTS.

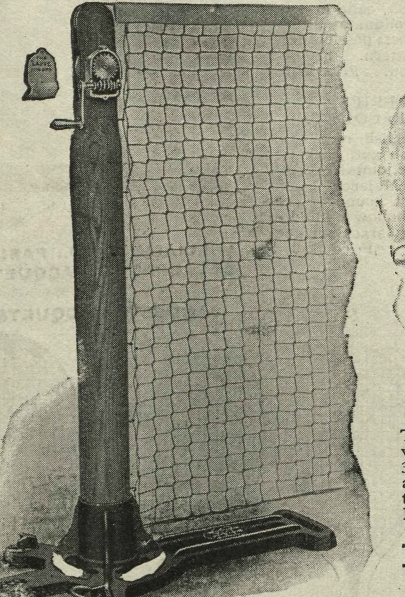
Posts are of Polished English Ash, 3-in. dia., fitted with strong Nickel-plated Winding Ratchet. Portable iron bases, the poles being easily removed from the sockets, secured to ground and held by spiral pin. Complete with spanner and drill. Best Steam-tarred Net, Copper bound, and Net Adjuster.
Price complete, **55/6**
Poles only, **38/0**

These Posts can be supplied with **T**-shape pins for hard ground if desired.

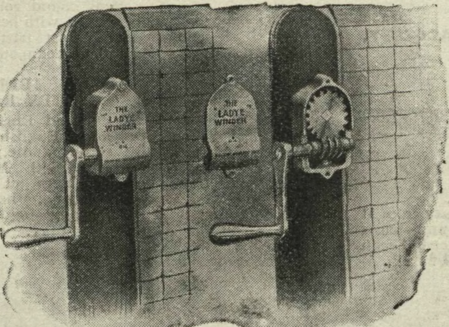


THE "HOLDFAST" LAWN TENNIS POSTS.

These posts are 3½ in. square, specially made for Ashphalted or similar Courts. The base is of heavy iron, which is let into the ground (with an iron plug to cover hole when not in use), the top of which comes flush with the ground. Fitted with improved nickel-plated worm-winding rachet. Price, poles only, **52/6**, complete with best Steam-tarred Net and Net Adjuster, **74.6**



THE "CORONET."



THE "CORONET" POSTS.

This is a strong serviceable Post and very smart in appearance. The Post is 3½ in. in diameter, tapered off at the top as shown in illustration. Made from the best selected old English Ash. The Ironwork is Machine Made and interchangeable.

THESE POSTS ARE FITTED WITH THE NEW PATENT "LADYE" WINDER.

The most perfect and powerful Winder for winding nets of tennis posts ever made.

Very little effort is required with this winder to wind a net to its proper height.

A girl 10 years of age can wind with ease, after a man has put all his strength into winding with the old style of winder.

No slipping back of Winder, this ensures that the net can be fixed at the exact height required.

No catch to trap or take off finger ends.
No catch to release to slacken net; simply turn back.
It is quite as easy to wind net as to release.
It is quite as easy to release net as to wind.
Impervious to weather as all working parts are covered.
Has a solid Drum to take Net Cord, enabling the hole in shaft of drum to be always opposite to hole in drum, thus enabling cord to be withdrawn without cutting. Price, Poles only, **49/0**

Complete with Best Steam Tarred Net and Adjuster, **68/0**

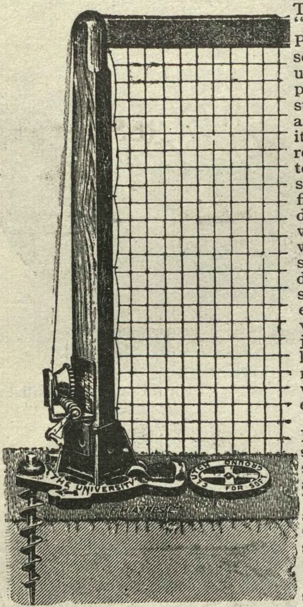
SPORTS AND GAMES DEPARTMENT.

LAWN TENNIS POLES AND NETS.

AYRES' DIAGONAL UNIVERSITY POSTS.



These Diagonal "University" Posts have the square wooden uprights so placed as to sesure the greatest amount of rigidity and to offer resistance equal to that of much stouter posts fixed in the ordinary way. The winding rachet with improved smooth taper drum is the most simple and effective yet devised, and adjustment of the height of the net may be made with the greatest exactitude and ease.

Posts, 2¾ in. square with screw spanner and clutch, or **T**-shaped pins, as desired, **42/0**. Complete with steam - tarred waterproof, bound net, screws, clutches, spanner and centre guide complete, **60/6**

Posts, ditto, ditto, 3½ in. square, and with portable feet, **56/0**

THE UNIVERSITY POST.

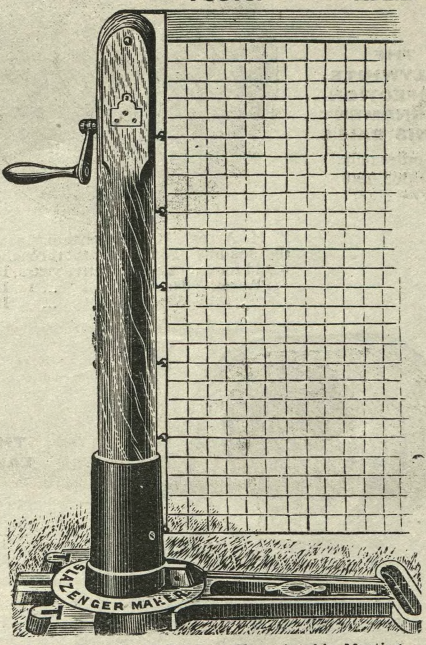
The speciality of these Posts consists in the winding apparatus being fixed near the base, giving greater rigidity to the posts, and in their having a winding drum so constructed as to obviate kinking and breaking of the copper cord whilst tightening the net.

With screws, spanner, or **T**-shaped pins.

The Posts are extra strong, 3½ in. square, the metal parts in nickel and brass, and are fitted with the portable feet. Price, poles only, **56/0**

Complete, with steam-tarred net, centre guide, **76/0**

SLAZENGER'S STADIUM (COLONIAL) POSTS.



As used at the All-England Championship Meeting, Wimbledon, and at the Queen's Club and leading Tournaments.

The system of winding is such that the minimum amount of power is required, a gradual strain upon the net being easily obtained, while the jerky action, which has been found so often to break the net-cords, is entirely obviated (see illustration). The Base is constructed in two parts, allowing the Pole to be easily detached, and rendering the same most convenient for packing or removing at nightfall, while the feet are enamelled so as to better withstand bad weather and rough usage. Price, poles only, **62/6**

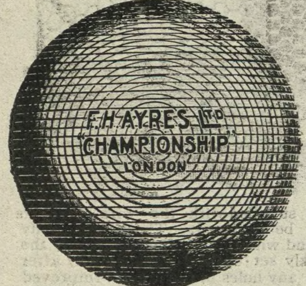
Ayres' Championship Croquet Balls.



"The Championship Croquet Balls have met with the approval of all who have used them as approximating most closely to the play of the Boxwood balls, and as proving themselves thoroughly durable under trying conditions. The greatest possible care is taken in the special processes of their manufacture to ensure correct resiliency, gauge and weight as well as freedom from bias and the danger of the cracking of the cover. They will be found impervious to wet or sun, and most lasting and satisfactory in use." They were used at the most important Croquet Meetings last season, including the Open Championships, the Irish Gold Medal, Champion Cup, Hurlingham, Windlesham, Hooton Park and elsewhere. ARCHERY & ROLLER SKATES.

BOWS.

To String and Unstring Archery Bows.

Warning.—The flat part of the bow is the outside and should be kept nearest the body in the act of stringing, or bow will in all probability be broken.

To String.—Hold the bow in the centre by either hand (whichever is more suitable to the archer), place the end on which the string is made a fixture in the hollow of the foot (not resting the bow on the ground), then pull strongly with the hand holding the centre of bow and press the string forward with the other until it reaches the nock made for it in the horn tip.

To Unstring.—The same attitude to be observed as when stringing, only pulling with the one hand and pressing with the other, so as to slacken the string, which should then be slipped out of the nock by the forefinger.

When the shooting is over, the bow should be unstrung. The bow must not be left or kept in a damp situation, and when not in use should always be kept in a bag.

Style A, Clamp Model...	per pair	21/0
,, B, Screw-on Model	,,	21/0

The size of the boot should be given when ordering.

A Roller Skate should have an adjustable rubber cushion, so that the trucks can be loosened or tightened at the skater's will. Our Skate has it!

Light weight is a great advantage.—The footboard and wheels, when made of aluminium-alloy, must make the skate much lighter than an all-steel skate. Ours are aluminium!

All-steel skates rely on rivets for securing the clamps and trucks to the footboards, and when these rust they are, to say the least, very unreliable. Ours haven't a single rivet in them!

Strength is an asset so essential in a skate.
Note the arch in ours!

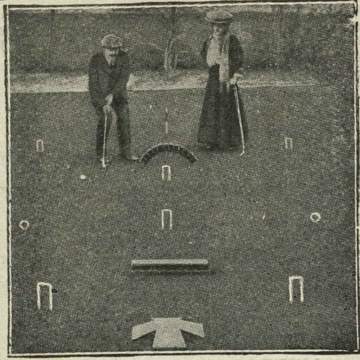
OUTDOOR GAMES.

SPORTS AND GAMES DEPARTMENT.



"Gofstacle." The New Putting Game.

Can be played all the year round. Golf balls and putters are used; the balls are four to the set, and are coloured like croquet balls. The obstacles to be played through include hoops, rings, a tunnel, a bridge, and a tray which has to be entered up an incline. The full game is very suitable for an ordinary tennis court, but can also be played on small lawns, while on very small lawns some of the hoops, &c., can be omitted. When a number of people play, as at garden parties, &c., the sets can follow each other round the same court, as on golf links; extra balls can be obtained for this purpose. Set complete in box and Book of Rules, with "Excelite" balls, **30/0** Putters **4/6** each extra.

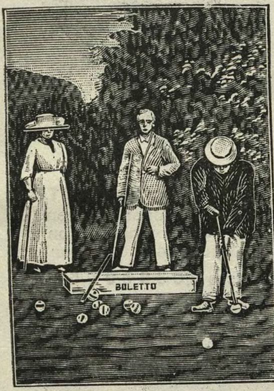
Clock Golf.

For Clock Golf all that is required is sufficient space on a smooth lawn to describe a circle to form the Clock Face. Only a Golf Ball and "Putter" are required to play the game. For practice in "putting" Clock Golf is unrivalled, and the interest it excites at Garden Parties shows it to be socially a most popular game. Set of Metal Clock Figures, painted white, Cup, Pins, Flag and Chain for marking circle, with Rules, in wooden box. Harrods' make, as above, **9/0** set.



S G 88. **Boletto.** The game of Boletto, whilst partaking of the nature of the old pastime of Bowls, contains additional features which render it specially suitable as a social lawn game in which both ladies and gentlemen can take part, and it is therefore a most useful game for parties.

No. 2 (b) Lawn. Containing 8 beech balls, 3⅜ in. diameter, varnished and painted, 1 beech jack, 4 polished sticks 2 ft. 10 in. long, with rules, packed in strong wood box, **9/6** per set.

The Game of "Castello."

"Castello" is a lawn game on an entirely new principle, and must not in any sense be confused with croquet. Set, consisting of 4 castles in brilliant colours, 4 superior boxwood mallets with specially shaped ends and band of colour to match, 8 coloured balls, 4 ringed and 4 plain, and 12 effective flags in 4 colours to be inserted in the tops of the castles, and rules in strong box. **28/6**

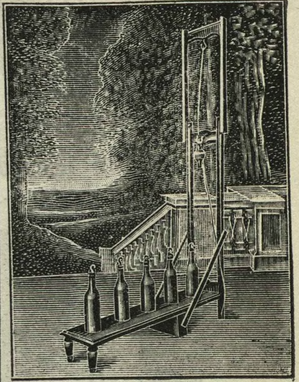
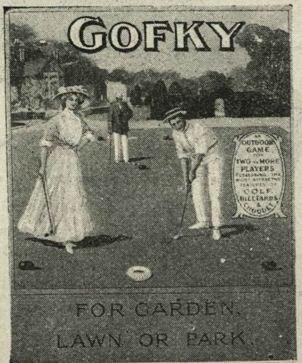
"Jonette" Regd.
JEFFERIES PATENT, LONDON.
Price 24/-

The newest game for small lawns. The only game for small lawns that gives as great an amount of sport as tennis. It is the outcome of long study, and the object is to give a smart, quick, dexterous game requiring but a small space. This is a want that has long been felt, and it is an ideal game for those who have neither time to keep in touch with a club, nor sufficient space for tennis at home. Ordinary tennis bats are used. A splendid game can be played on a lawn 40 ft. by 12 ft. or even smaller. Complete Set:—2 brass jointed poles with iron spike, brass bound, 2 cross arm pieces, 1 12-ft. net complete, 1 mallet, 2 guy ropes, 4 iron pegs, 2 balls, 1 book of directions with description. Complete in Box, **24/0**



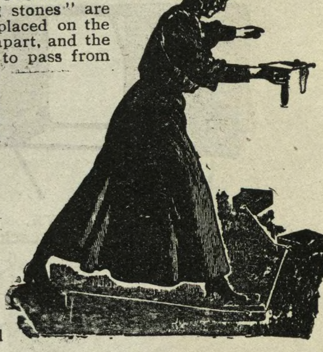
S G 110. **Bottle Catching.** The most amusing and scientific game for indoors and outdoors. The idea of the game is to hook the bottles on to the line, and the one who catches the most bottles and scores the largest number of points wins the game. **25/0**



GOFKY
AN OUTDOOR GAME FOR TWO OR MORE PLAYERS POSSESSING THE MOST ATTRACTIVE FEATURES OF GOLF, BILLIARDS & CROQUET
FOR GARDEN, LAWN OR PARK

This game meets the demand for an outdoor game which, whilst not requiring a large area for play, possesses in a marked degree the qualities which make Golf, Croquet and Billiards so popular. Two or more can play, and the more players the greater the chance to exercise the skill and tactics the game calls for to win it outright. It preserves the attractions of Golf so far as putting, short drives, stymies and bunkers, &c., are concerned; the nine hole game with four playing occupying about two hours with expert players.

No. 2 Set.—5 Association Gofky jacks, made from selected Lignum Vitæ, highly polished, with inset bone numbers, 2 Association cast-iron aluminium-painted holes 2 numbered golf balls, packed in strong square iron-bound and battened case with handle on top **25/0.** Putters, Mashies, **4/6** extra. Score Cards **0/6** Doz.



S G 87. **Stepping Stones.** A number of "stepping stones" are provided, which are placed on the ground at a distance apart, and the players are required to pass from one end of the series to the other, carrying in one hand a small flat board upon which has to be balanced a wooden ball.

A splendid game for parties. **5/0**

KITES.

SPORTS AND GAMES DEPARTMENT.

Instructions for Flying "BrooKite" Kites:—If the Operator is standing in a place sheltered from the wind, it may be necessary to send the Assistant down wind with instructions to hold the Kite over his head. The Operator then pulls the line, when the Kite will soar at once. No tails are required to balance the "BrooKite," which is scientifically constructed, and such fixings are therefore not necessary. Should the Operator be standing in an open space, the Kite will leave the hand immediately it receives the full force of the wind. Always let out as much line as possible, and allow the Kite to float away from the hand. Then at once pull the line smartly, and the Kite will immediately soar overhead and well into the upper and steadier wind currents.

Instructions for adapting Kites to Light and Heavy Winds.—Light Winds: Kites are sent out already adjusted to fly in light breezes. Heavy Winds: Shorten bottom bridle cords by tying a loop knot in same.

THE "HARRODIAN" KITE

Is the result of experiments by a well-known Kite expert to combine—

STABILITY, STEADINESS IN FLIGHT, SIMPLICITY,

with that greatest essential feature in Kites,

GREAT LIFTING POWER.

The lifting power is obtained at an extraordinary angle of flight, while in fact the Kite is soaring almost straight over the head of the operator.

The trials which have been made with the "CRENELL" patent handle demonstrate that the principle upon which it is designed affords the greatest obtainable resiliency. The stick drives with remarkable ease, and is free from jarring and stinging which is found in many composite handles. The "Crenell" handle is made up of two sections faced with rubber working in grooves one within the other, and the yielding of the sections is controlled to a nicety. The "Centre Balance" Hockey Stick marks an entirely new departure in Bulger Head design, by which is secured a maximum amount of drive and strength with a minimum proportion of weight. The special feature of this improvement is the longitudinal fluting of the crook at each side of the bulge. This centre balance is of the utmost value in driving, and it is poised so delicately that it answers in an ideal manner for fast play and dexterous passing. It will be noted that the edges of the "Centre Balance" model are much wider than is possible in an ordinary Bulger stick, and this additional edge strength obviously ensures greater freedom from splitting and chipping. **8/6**

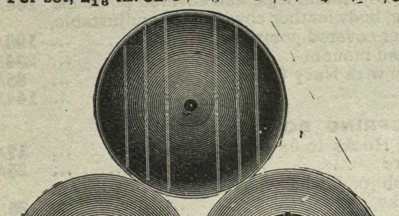
MADE IN ENGLAND

S G 249. The Crystalate Ball is generally considered to be the best composition ball on the market, and is guaranteed. The World's Record made with the Crystalate Billiard Ball. George Gray, playing with Crystalates in a contest at Melbourne, on August 25th, 1909, compiled a break of 836, which constitutes the World's Record in English Billiards upon certified standard table.

Per set, $2\frac{1}{16}$ in. 31/6; $2\frac{1}{8}$ in. 31/6; $1\frac{3}{4}$ in, 10/6



S G 252. The Crystalate Instructional "Target" Billiard Balls. Reasons why every billiard player should use the "Target" Balls:—Because the correct division of the object-ball and the precise point where the cue-ball should be struck form the golden secret of successful play. The markings on the "Target" Instructional Balls enable the player to accomplish both these things at will. A booklet, with diagrams, sent on application. Price, per set, 63/0

THE LOOP DEVELOPER.

Made of the finest spring steel, tempered by a special process, the slightest pressure works the handles, so that the pectorals and other muscles of the chest are put in tension in a manner extremely beneficial to the user. There is no need for any tearing, jerking, or straining. The Magic Ring provides precisely the degree of resistance the exerciser desires.

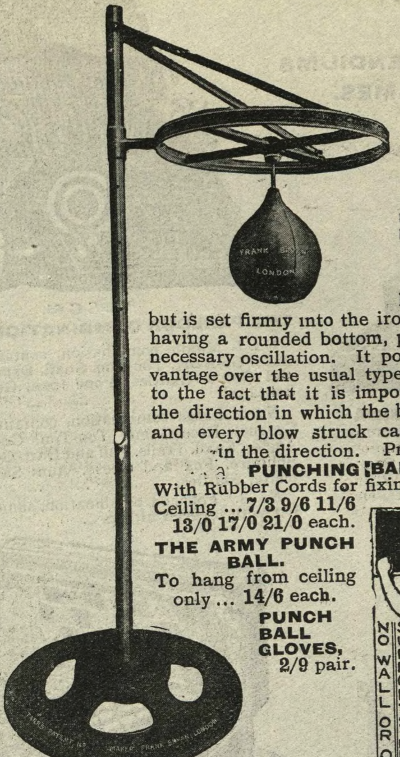
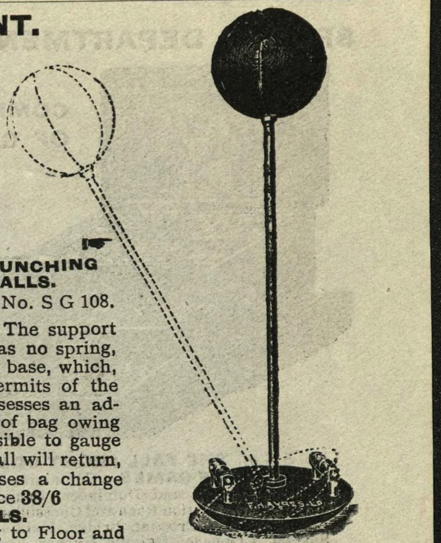
IMPROVED HYDRAULIC SCULLING EXERCISER.
No. S G 104. The stroke given by this machine faithfully resembles that of actual sculling on the river, where the stronger the pull the greater the resistance, an effect which in the Exerciser is quite naturally imitated by a corresponding resistance of the water in the cylinders. Price **110/0**





☛ **PUNCHING BALLS.**
No. S G 108.

The support has no spring, but is set firmly into the iron base, which, having a rounded bottom, permits of the necessary oscillation. It possesses an advantage over the usual type of bag owing to the fact that it is impossible to gauge the direction in which the ball will return, and every blow struck causes a change in the direction. Price **38/6**

AS CHEST EXPANDER

THREE · · · EXERCISERS · · · IN ONE

No. S G 706.

Invented by Eugen Sandow (the greatest living authority on Physical Culture), and as used in all the Sandow Schools of Physical Culture. The New Model Sandow Developer is a vast improvement on the old pattern, for in addition to the old methods of using it, by a special device this can now be attached to the feet, and so used in the most confined space. . . . This is a feature which Mr. Sandow has long sought to make practicable.

The six strands are now of equal length, and the Developer handles have three loops, so that it will make a perfect Chest Expander of from one to six strands. Price **12/6.**

New Tops or Joints.—When required, it is absolutely necessary that at least the joint into which the new part is to be fitted should accompany the order, as in its absence a new part cannot, under any circumstances, be supplied. If possible, it is more satisfactory to send the whole rod.

In Ordering Rods.—In addition to giving the Number and description, Customers are particularly requested to state the Length desired where various lengths are stocked.

Note.—Rods should never be allowed to remain in damp cases, nor the tops in damp Landing Handles. Carefully dry the rod with a soft cloth after use. A little dry soap rubbed on the ferrules before putting the rod together will ensure the joints coming apart easily. Vaseline and other lubricants should *not* be used.

Also above patterns can be had tied on double hooks, sizes 3/0, 2/0, 1/0, 1, 3, 5, 8.

All Salmon Flies stocked are dressed with gut loops, which will be sent in all cases where Salmon Flies are ordered unless otherwise stated.

Salmon Flies on metal-eyed Limerick single or double hooks (to order only) 0/2 each extra.

In ordering Salmon Flies customers are particularly requested to specify the size hook desired, whether single or double.

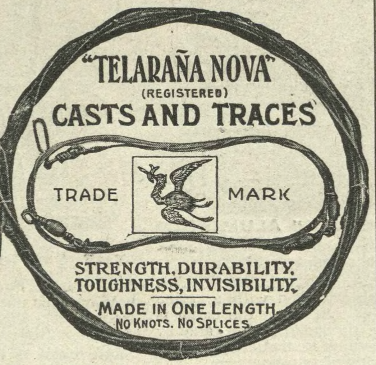
Salmon Flies.—Dressed to Pattern.—This work is undertaken by experienced tyers, and the greatest attention is paid to ensure accuracy as to details. A small number of flies can generally be tied at a few days' notice, but in the busy season customers will oblige by giving as much notice as possible.

All Flies dressed to patterns will be charged extra.

Most of the above Flies are usually in stock, but we cannot guarantee any particular size.

THE NEW GUT SUBSTITUTE.

("Robertson's" Celebrated)



During the past season "Telarana Nova," Sizes Nos. 1, 2, and 3, have been tried, without a single complaint, for big fish all over the world—Europe, Asia, Africa, and America testifying to the suitability and excellence of these casts and traces for heavy fish, and in Sizes Nos. 4, 5, and 6, it has been used for May Fly fishing with most successful results.

No. FT 1036. THE "HERCULES" GUT CASTS.

We claim that by steeping the Gut in a special preparation the pliability and softness are so greatly increased that the subsequent process of knotting it into Casts does not injure the Gut in the least. It not only gives to the Gut flexibility and greater strength, but also durability, as the preparation protects the Gut from the action of air and light. *Every Cast tested.*

Each Cast is labelled "Hercules," and bears our Trade Mark.

EVERY DESCRIPTION OF TAXIDERMIST WORK undertaken.

CUSTOMERS ARE PARTICULARLY REQUESTED to ask for WRITTEN estimates, as VERBAL ones are necessarily only approximate, and cannot be recognized as final under any circumstances.

In sending specimen birds or animals in the flesh, also fish intended for presentation or mounting, Customers will oblige by addressing them as follows: Naturalist Department, Harrods, Brompton Road, S.W.

HINTS TO NATURALISTS.

If Customers will observe the following simple directions in sending Specimens for preparation it will ensure them reaching us in good condition.

ANIMALS' SKINS, if freshly taken off, should be laid out in the air (not in the sun) skin side up until they can be despatched to us, which should be done as quickly as possible. Fold the skin up hair outwards, with some straw or shavings between to prevent the skin coming together. If the weather is very hot sprinkle some salt on the skin as soon as it is taken off the animal. ALWAYS KEEP skins, heads, etc., as dry as possible.

FOX BRUSHES should have a tapered piece of stick inserted into them after the tail is drawn out.

DRESSING AND CURING.—Nearly all work in Natural History must be allowed a considerable time for drying, so that it is in most cases impossible to return Specimens in a few days.

The above are delivered Carriage Free, subject to the Conditions set forth on pages 3 and 4.

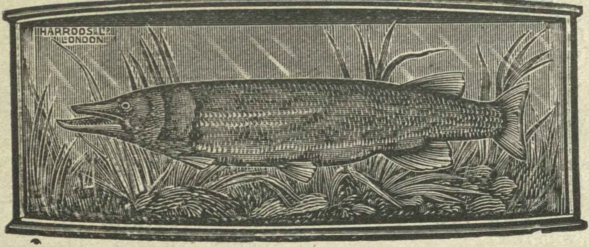
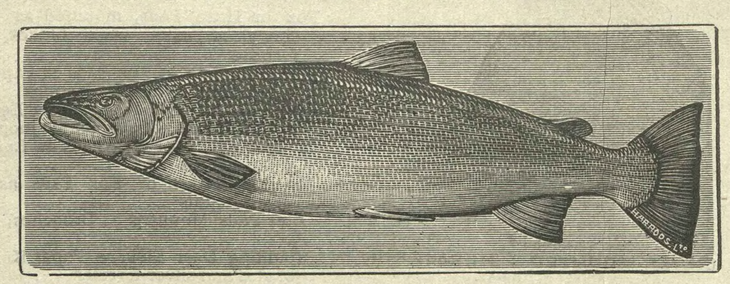
FISH Mounted in Glass Cases, or carved and painted models on wood panels (deal, stained mahogany), to hang on a wall.



SPECIMEN FISH IN CASE.



CARVED MODEL ON WOOD PANEL.

SPECIMEN FISH IN CASE.

The following are approximate prices for preserving and mounting specimens in cases of various shapes. Written estimates can always be obtained on application—

Fish, 1 lb. weight ....from **8/0** up to **16/0** } According to style { Fish, 12 lb. weight ....from **£2** to **£3**
,, 8 ,, ,, ... ,, **30/0** ,, **47/6** } of case, &c. { ,, above these weights at proportionate prices.

As fish for mounting require a considerable time for drying and "setting" properly, the execution of an order for even a single specimen usually takes at least 3 months, and sometimes much longer.

Carved and Painted Wood Models of Specimen Fish on Wood Panels (as illustrated) for hanging on a wall.

Customers desiring to have mementoes of Specimen Fish, can obtain the same in Wood accurately carved and correctly coloured. All that is required is the outline of the Specimen on a sheet of paper, the weight and girth should also be stated for the carver's guidance, and any special detail as to colouring. Prices according to size of fish; for instance a 20 to 30 lb. Salmon costs about **£3 0 0.** Carved Specimen on view in Department.

GUN DEPARTMENT.

Guns, Rifles, Revolvers and Ammunition.

In Quality, Durability and Accuracy the Guns and Rifles displayed by us are in every way equal to those of the best Gunmakers. Special Terms allowed to Clubs or buyers of large quantities.

GUN FITTING, TESTING GUNS AND RIFLES, SHOOTING SCHOOLS.

Nothing is more essential to good shooting than that a gun should fit properly.

Too much stress cannot be laid on the great importance of the fitting of a gun, and customers are recommended to utilise the TRY GUN and apparatus supplied for this purpose.

Special arrangements have been made for the convenience of customers with the Uxendon Shooting School and Club, Uxendon, near Harrow, whereby continuous practice at Inanimate Birds from High Towers, also Grouse Butts, Imitation Partridge Driving, etc., etc., can be obtained. The Grounds are laid out as a Sporting Park, with Paths, etc., and fully equipped with all modern appliances, providing customers with Field Shooting practice of every description. The services of Competent Instructors are always available.

Gun-fitting a Speciality.

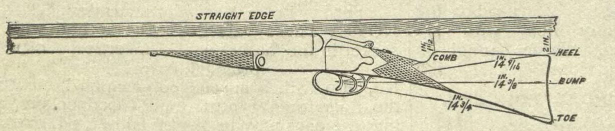
TO MEASURE THE STOCK OF A GUN.

Customers ordering new guns by post, and wishing them to be of special dimensions, may measure a pattern gun in the following manner:—



WAREHOUSING GUNS AND RIFLES.

For the convenience of customers, Harrods warehouse guns and rifles on their own premises at the following charges:—

Stripping, Cleaning, Warehousing and Insuring, **7/6** per gun or rifle for a year or part of a year. If a gun or rifle remains in warehouse for more than one year consecutively, the charge for every year or part of a year, after the first, will be reduced to **5/0**.

Harrods will not store any weapon without first having it thoroughly cleaned, nor can we hold ourselves in any way responsible for the safe keeping or condition of weapons left unless warehoused as above.

GUN REPAIRS AND ALTERATIONS.

Special arrangements have been made to execute any repairs or alterations to guns and rifles by an efficient staff, and at such prices as will ensure economy with excellence of workmanship. No effort will be spared to expedite the execution of repairs. Estimates will be forwarded if desired before putting the work in hand.

The following are approximate prices for general repairs:—

THE TERRITORIAL SERVICE RIFLE. ·303 Bore.

No G.N. 28. NOTE.—This is the well-known Long Lee-Enfield Pattern Rifle, which has been modified by the introduction of (1) new Backsight Slide, Leaf and Bed; (2) new Foresight and Protector; (3) a "Charger Guide Bridge," and (4) a new (Deeper) Magazine, to bring it more up-to-date for the use of the Territorial Forces. The Charger Guide Bridge fitted to the action allows of very rapid loading from Clips and the Deeper Magazine affords better accommodation for 10 Cartridges. The N.R.A. have sanctioned the use of this Rifle in all Service Rifle events at Bisley, 1912. Privately Owned Rifles of old pattern can be converted.

IMPORTANT NOTICE.—PISTOLS ACT, 1903. This Act provides that no Pistol may be sold unless a Gun or Game Licence is produced. Clients are, therefore, requested when giving their orders for Pistols to bring or send their Gun or Game Licence. The following are permitted, however, to purchase Pistols without a Gun or Game Licence, but evidence must be furnished which will satisfy us that our Client is entitled to exemption under the Act. Any person in His Majesty's Naval, Military or Volunteer Service, or in the Constabulary or other Police Force requiring a weapon to use on service, or in the course of his duty, or any householder purposing to use the weapon in his own house or the curtilage thereof, or persons about to proceed abroad for a period of not less than 6 months, who produce a statement to that effect, signed by themselves and a police officer of the district in which they reside, of rank not lower than an Inspector, or by themselves and a Justice of the Peace.

AMMUNITION. GUN, RIFLE AND AMMUNITION DEPARTMENT.

A good assortment of 12, 16 and 20 bore Cartridges, with Standard Charges, are usually in stock in the department. Cartridges of other bores or with Special Charges can invariably be despatched within one to three days' notice.

NOTE.—Nitro or Smokeless Powders occasionally vary with regard to strength and other conditions, according to weather, storage, etc. We cannot accept any responsibility of the different makes of powder, but recommend to our customers cartridges loaded with the powders that are most used and have been well tested and tried by all conditions.

Not less than 100 Cartridges supplied: Cartridge orders should be given three days in advance. To be delivered in the country for special date longer notice must be given. Cartridges cannot be sent by post, and cannot be included in other parcels.

FREE CARRIAGE.—Quantities of 500 of any Cartridges, 12 to 28 bore, per goods train CARRIAGE PAID to any Station in the United Kingdom.

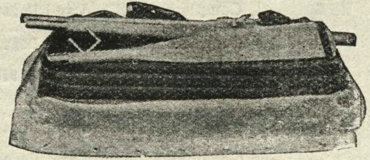
BOATING DEPARTMENT

No BIG GAME SHOOTER, FISHERMAN or YACHTMAN'S KIT is complete without an

ACCORDIAN FOLDING BOAT.



BOAT COLLAPSED IN VALISE.

For Big Game Shooters, Duck Shooting, Fishing on Scotch Lochs, Yachts, Dinghies, etc., these boats are admirably suited, the materials employed are the best, the canvas used is of a special make. Made specially for the manufacturers, this canvas is treated with a Flexible Preserving Paint, rendering it waterproof in any climate, and insect-proof. The ribs, etc., are of selected Canadian Elm. The boats are so constructed that they fold in their length, concertina fashion, which gives them a distinct advantage over those types of Folding Boats which always maintain their length, only reducing their width or depth. When packed these Boats stow in a Canvas Valise, the whole occupying but little more space than a Gladstone Bag, which permits it being carried as personal baggage. To make ready or collapse the boat is the work of a few moments, and when in use they are equally as rigid as a wood boat, being practically flat bottomed they draw but little water, and have great carrying power, and it is possible to stand and cast a line or shoot with perfect safety.

Complete with 1 pair Jointed Oars, 1 pair Rowlocks, and Waterproof Canvas Valise.

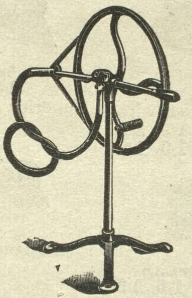
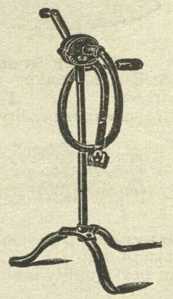
Model No. 2, as above, but smaller size, fitted with patent spiral shaft and adjustment, and metallic flexible cover £3 10 6
Ditto fitted with chain shaft and canvas cover, £3 1 6



The "Empire" Power Clipper, No. 9. This machine has a direct drive, is fitted with flat band, and ball bearing knife.
Fitted with patent spiral shaft and adjustment, and metallic flexible cover, £2 9 0



The "Klip Quick" Power Clipper, made by the Brown Clipper Co., Birmingham. Fitted with patent spiral shaft and metallic flexible cover, complete with ball bearing knife, 45/0
Ditto with chain shaft and canvas cover, 32/6

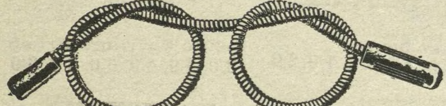


Illustration of the new Flexible Metallic Cover, as fitted to Brown's "Empire" Power Clippers, which is another distinct advance on the old method of Canvas Covering. As flexible as the spiral shaft, always clean to handle and of great durability.

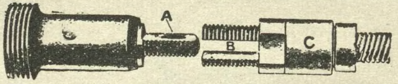

Diagram of the patent attachment, as fitted to Brown's "Empire" Power Clippers. Showing the improved method of attaching knife to spiral shaft. The flatted end of the spindle A is threaded on the edges and fits into the clutch B also threaded. The collar C is then screwed over and so makes a perfect joint.

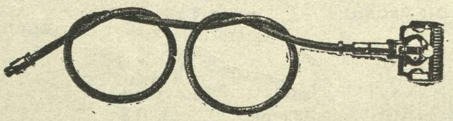

Illustration of the Frictionless spiral shaft and patent attachment with "Empire" ball bearing knife attached, as fitted to Brown's "Empire" Power Clippers. Can be driven with perfect ease even when shaft is knotted (as illustrated), or turned at a most acute angle. The invention of this spiral shaft disposes of the old and crude method of driving with a chain shaft, the links of which are liable to break or kink, and which compels the use of the clumsy device known as a "wrist joint."

NEW IMPROVED PATTERN UMBRELLA CASE.

We consider this a great improvement on the old pattern case. It has a light rod running the whole length of case, which is protected and strengthened with a lay on of brown cowhide. We would call special attention to the cap, which is attached to the case and cannot be mislaid.

Made in our own workshops of superior quality brown waterproof canvas, with leather bottom.

MOTOR DEPARTMENT

THE rapid growth of Harrods' Motor Department affords conclusive evidence of the unique advantages offered by the firm to purchasers in this direction. The general policy governing the Department consists in exhibiting a large and comprehensive stock of all kinds of cars, motor cycles, accessories and clothing ; and while keeping absolutely free from bias in any direction, affording to customers expert advice relating to the selection of goods which will best suit their individual requirements. The advantages of such a policy are very great. Being entirely free from all contracts which would have the effect of limiting their interest to any particular lines of goods, Harrods have no interest save in the complete satisfaction of their clients, who are enabled to inspect and compare the most up-to-date specimens of a score of the leading makes of cars or cycles, the latest devices in accessories, and the newest ideas in motor clothing. The Motor Showrooms in Basil Street (immediately opposite one of the entrances to the Main Building) have been equipped with every regard to the comfort and convenience of visitors, who, whether deciding to purchase or not, cannot fail to be interested in the large and varied display of goods. Information on any question relating to motoring is readily given and every effort made to convince clients that a great saving in time, trouble and expense is effected by dealing with Harrods. Comparison of prices is especially invited, since Harrods, being such large buyers of stocks, are thereby enabled to quote extremely favourable prices to customers.

CARS OF 1912

It is impossible in the space at our disposal to give full particulars of all the cars at present on the market, but for the assistance of possible clients we will send on application particulars of any make or model, or a complete list of all the principal 1912 models, and also quote for special bodies and general equipment such as lamps, speedometers, electric horns, etc.

MOTOR CYCLES.

The number of Motor Cycles now on the market has increased to such an extent that we have found it necessary to issue a separate Motor Cycle Catalogue, in which will be found conveniently arranged illustrations, particulars and prices of the newest patterns of Motor Cycles, Side-cars, Motor Runabouts, Accessories, Clothing, &c. This Catalogue, which we have striven to render as complete and useful as possible, can be had post free on application. The Motor Cycle Showrooms contain specimens of all the leading makes, the special features of which will be explained by experts ; and in the Accessory and Motor Clothing Departments every possible want of the Motor Cyclist is catered for.

Motor Department—DEFERRED PAYMENTS SYSTEM.

Special attention is drawn to Harrods' system of purchase by deferred payments, by means of which a customer is enabled to acquire immediately a much better quality car or cycle than he could purchase by a cash-down purchase. It is an axiom of motoring that the upkeep of a car is in inverse ratio to its first cost, and it therefore follows that the extra price paid for a superior car or cycle in the first instance will be balanced by a corresponding saving in upkeep charges. Following are details of the system :

Period.

The deferred payments are spread over a period of six or twelve months to suit the convenience of our clients, and include not only the machine but all the accessories sold with it.

Interest.

For **12** months **2½** p.c. premium is charged. For **6** months **1¼** p.c. premium is charged.

Method of Reckoning.

To the price of the car is added the price of the Accessories, and to this the amount of premium for six or twelve months, as the case may be. One quarter of the total thus arrived at, plus or minus the odd shillings (so as to leave an even sum in pounds), is payable at once and the balance in six or twelve equal monthly instalments.

Example.

Cost of Machine and Accessories, **£440 10 0.**

For 6 Months.			For 12 Months.
£440 10 0			£440 10 0
5 10 2	1¼ per cent. interest.	2½ per cent. interest	11 0 3
£446 0 2			£451 10 3
111 0 2	1st payment.	1st payment	113 10 3
£335 0 0			£338 0 0

which is divided into six equal monthly instalments of **£55 16 8**

which is divided into twelve equal monthly instalments of **£28 3 4**

Insurance.

The Car must be adequately insured by the purchaser, and in this connection Harrods offer a most advantageous policy.

References.

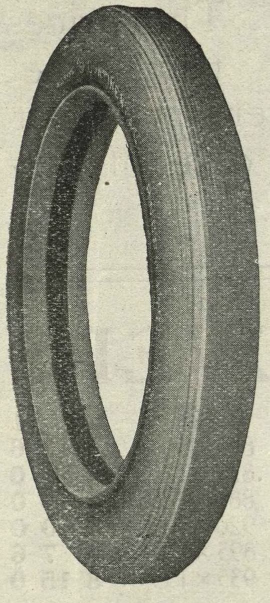
When placing an order it is necessary to forward a Banker's or other suitable reference, and in the case of a *Minor*, or where the client is not a householder, the name of a relative or friend who is a householder and who will join in the transaction.

Tyres and Tubes.

HARRODS STOCK ALL THE LEADING MAKES of Motor Tyres and Tubes, Detachable Bands, etc., and any goods not listed will be obtained to order. While taking every care to ensure customers' satisfaction the Company do not hold themselves liable for claims under manufacturer's guarantee.

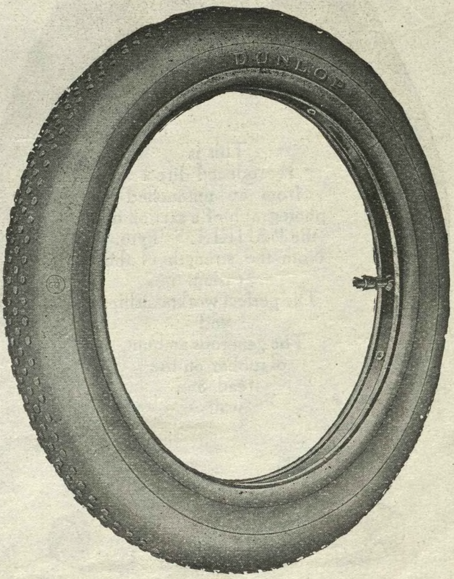
The prices quoted are those in force at the time of going to press, but they are subject to market fluctuations. All tyres are sent by passenger train, carriage free.

For convenience of reference particulars are arranged under the following principal headings—

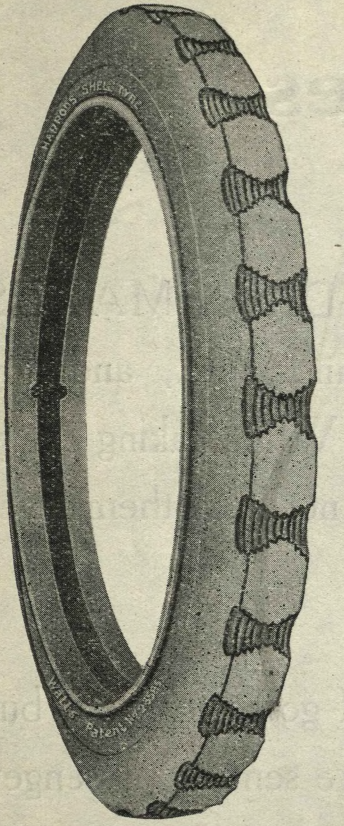


ALL RUBBER—Round or Square Tread; Ribbed or Grooved; Rubber Studded.

STEEL STUDDED—On Rubber; on Leather.

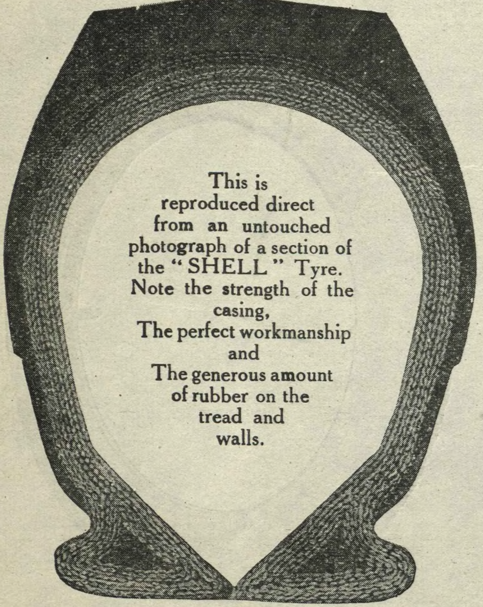


"SHELL" Patent Grooved TYRES



ALL RUBBER SQUARE TREAD.
NOTE THE PRINCIPLE.
IDEAL AT EVERY POINT.
A 50 per cent. IMPROVEMENT
OVER PLAIN GROOVES.

HARRODS have much pleasure in recommending the well-known Shell Patent Grooved Tyre as one which possesses all the characteristics of an ideal Tyre, and yet is sold at a strictly moderate price. It is made specially for Harrods, and care is taken to use only the strongest Egyptian cotton and the best quality Para rubber in its construction; these materials being toughened by a special process which gives the Tyre a remarkable power of resistance to flints, nails, etc., and renders it exceptionally durable. The design of the "Shell" patent groove secures a much better "grip" than the plain groove type, while its open-ended grooves prevent the tyre getting unduly heated. Our two years' selling experience with this Tyre enables us to speak with confidence as to the satisfaction to be expected from its use. The prices given below are subject to market fluctuations, and customers will get immediate benefit in the case of any reductions that may occur.



This is reproduced direct from an untouched photograph of a section of the "SHELL" Tyre. Note the strength of the casing, The perfect workmanship and The generous amount of rubber on the tread and walls.

Inner Tubes.

THE THICKNESS OR WEIGHT OF AN INNER TUBE does not afford an accurate criterion of its quality. The rubber used in the construction of tyres and tubes is "prepared" or "treated" with substances, most of which are considerably heavier than pure rubber, which is extremely light; it may therefore be presumed that, given a fair amount of thickness or substance, the lighter a tube is, the larger the proportion of pure rubber used in its manufacture.

Harrods take especial care to ensure the uniformly high quality of all tubes sold by them, and are able in many cases to supply these at lower prices than those charged by the best-known makers. Each tube is carefully tested before leaving Harrods, and is sent carefully and securely packed in strong cardboard box, carriage paid within the United Kingdom.

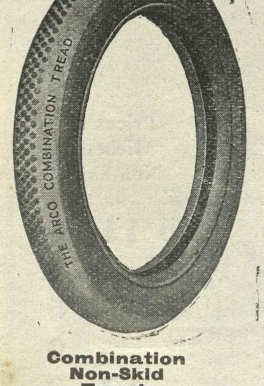
Retreading.

THOUGH the life of a cover may be greatly prolonged by retreading, it must be borne in mind that this operation must be resorted to before the tyre is so much worn that the canvas case has become loosened or disintegrated. Generally speaking we do not advise that non-skid tyres should be retreaded, as in most cases it will be found that wet has worked through the stud holes and damaged the canvas. All rubber tyres, however, unless badly cut can by retreading be made thoroughly effective for running on front wheels (or back wheels of light cars). Harrods will gladly examine and report on tyres submitted to them with a view to retreading



Combination Non-Skid Tread.

We first retread the Tyre with a Plain Rubber Tread, and then fix a Chrome Leather Band fitted with Hard Steel Studs. This Tread we strongly recommend.

NOTES.

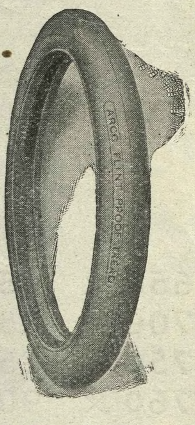
Repairs to bursts only charged according to extent.

The foregoing prices do not include extraneous repairs that may be necessary, such as bursts or puncture holes, and in consequence charges vary according to the extent of the damage.

Unless definite instructions are given, we assume all repairs may be left to our discretion, and proceed accordingly.

TIME TAKEN: Three to seven days. Urgent Repairs: 48 hours.

The above prices are subject to alteration without notice.

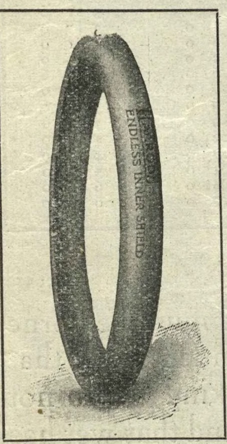


The Arco Flint-Proof Square Tread.

This Tread we can fix to any make of tyre, and same is done by the moulded process.

LINERS FOR WEAK OR WORN COVERS.

BUT few motorists appear to realise the fact that by the intelligent use of "liners" within the covers of their tyres they can reduce their tyre expenses by 50%. Their failure to avail themselves of so advantageous a boon probably arises from a fear that the fitting would be so troublesome and the cost so considerable that no ultimate gain would accrue. So far as the latter point is concerned, we append a table showing the cost of Harrods' Endless Liner as compared with a new Michelin Non-Skid Tyre. With respect to the fitting, this is quite a simple matter, and if the following directions be observed, no trouble will be experienced.



Lay the liner in the cover, then place the tube in position, slightly inflated, and put the cover, liner and tube altogether on to the rim. Should the liner be in any way displaced in doing this, it can easily be pushed back so as to rest evenly all round. No solution is required. Plenty of French chalk should be used between the liner and tube, but none between liner and cover.

FROM A WORN TYRE THAT HAS BECOME UNSAFE FOR FURTHER USE ANOTHER 1,000 MILES' WORK CAN BE OBTAINED BY THE AID OF A LINER, WHICH WILL STILL BE AVAILABLE FOR THE NEXT TYRE.

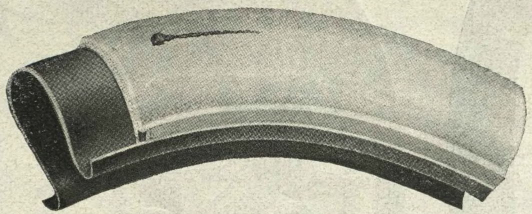
HARRODS' TWO-ENDED LINERS.



FOR those who prefer a different type, Harrods supply a strongly made two-ended Liner at a slightly lower price than the Endless Liner. This should be fitted with strong rubber solution.

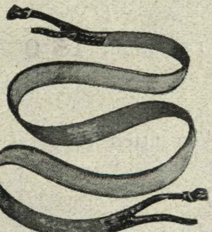
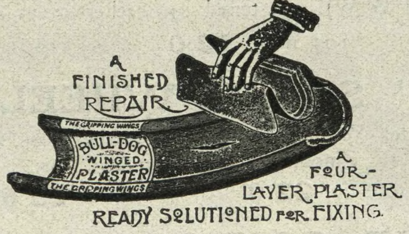
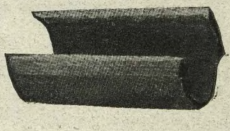
WINGED PLASTERS for Tyres & Tyre Gaiters.







The "Bull-Dog" Plaster.

MOTORISTS will find it well worth while to include one or two Tyre Plasters in their equipment for use in the case of gashed covers. An outside plaster can be fitted very quickly on the road, and suffices until the immediate journey is finished. As it presents a somewhat unsightly appearance, however, it should be replaced as soon as convenient by an inside plaster, which should be solutioned in position; at the same time the gash should be filled in and vulcanised to prevent damp penetrating to the canvas. For those unskilled in tyre fitting a better plan will be to fit a tyre gaiter to the damaged cover.

HARRODS
MOTOR CYLINDER OIL
GRADE B

Lowest Price. Highest Grade. Free Drums. Free Carriage on 5 Gallons and upwards.

A claim founded on their experiences of lubrication whilst running upwards of 200 touring (hire) cars and motor delivery vans.

They believe they have succeeded in obtaining a lubricant without equal, despite the remarkable price.

Harrods' Motor Oil is of uniform consistency, and entirely free from foreign matter. It ensures perfect lubrication of every part of the engine, does not gum up, and contains nothing to cause carbonisation.

It will be noticed that the prices are about one-half the usual; drums, cans, and barrels are free, and carriage is paid on quantities of 10 gallons and upwards.

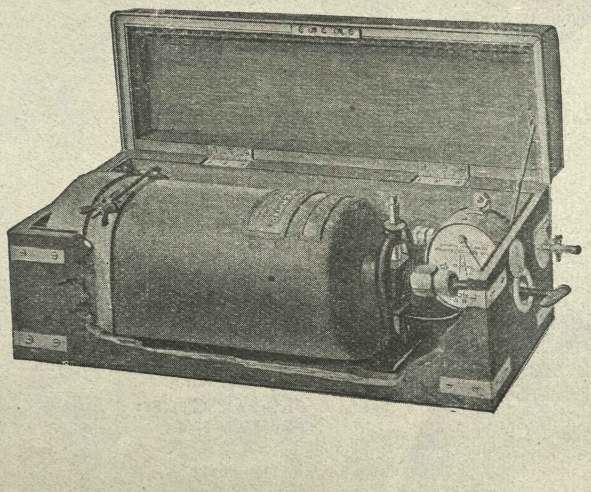
Dissolved Acetylene for Motor Vehicle Lighting.

Dissolved Acetylene is clean, dry, pure Acetylene stored in light steel cylinders under a moderate pressure. Before being charged with Acetylene, the cylinders are filled with a porous material in the form of cement, which is then hardened by baking into a brick from the pores of which all air is exhausted and replaced by a known quantity of Acetone. Acetone is a liquid hydrocarbon which has the property of absorbing or dissolving many times its own volume of Acetylene, with the result that at a nominal pressure of 150 lbs. to the square inch it is possible to store a hundred times the cylinder's own volume of available Acetylene. In use, immediately the cylinder valve is opened, the Acetone commences to give off dry, pure, clean and cool Acetylene and will continue doing so until the contents of the cylinder are exhausted.



20 cubic feet of pure gas ready to turn on and light.

LEITNER'S PATENT AUTOMATIC SYSTEM.

This Dynamo is a modification of the well-known Leitner Train Lighting Machine, and has been applied to motor car lighting for several years, during which period it has earned a high reputation for efficiency and reliability. Special notice should be taken of the fact that with the Leitner Machine a constant voltage is obtained despite the great variation of speed the machine is subject to when applied to car lighting.

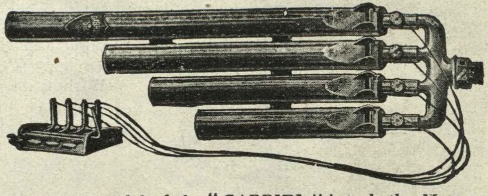
Brass or nickel-plated "PARIS EXPRESS," Exhaust Whistle. Gives a very shrill tone Price 15/0 each.



This new model of the "GABRIEL" is truly the Motor Horn "de luxe." It is a decided innovation, which constitutes a perfectly practical road-signal. Wires connected to a keyboard placed adjacent to the driver's seat allow the notes to be operated separately or simultaneously, to reproduce bugle calls or a variety of musical combinations. Thus a distinctly novel alarm is provided which admirably fulfils its purpose as a road-clearer.

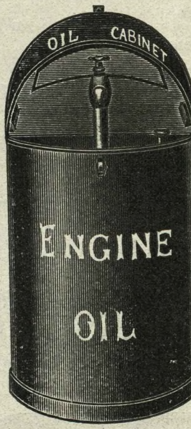
IMPROVED PATENT OIL CABINETS.



The Cabinet is made of Tinned Steel with galvanised iron bottom, and is of the very best finish and workmanship throughout.

It shuts up and is Dust-Proof, and owing to its double lid is entirely free from smell.

The Pump is made of polished brass, simple in its construction, and cannot get out of order.

It will fill a one-gallon measure in twelve seconds.

If the measure or vessel be pumped too full the overflow runs back into the Cabinet.

Lithanode Unspillable Accumulator.

ACCUMULATORS & IGNITION SUNDRIES.

LITHANODE PATENT UNSPILLABLE ACCUMULATORS.

The Lithanode Patent unspillable arrangement, which allows the use of free electrotype (diluted acid), entirely obviates leakage and damage that arise from acid spray. This is of great advantage to users, as if a machine fitted with a Lithanode unspillable battery is inverted no electrolite can escape.

We recommend The "Lithanode" when an accumulator is required to be sent charged by train, as the railway companies often refuse to take the ordinary pattern accumulator if charged.

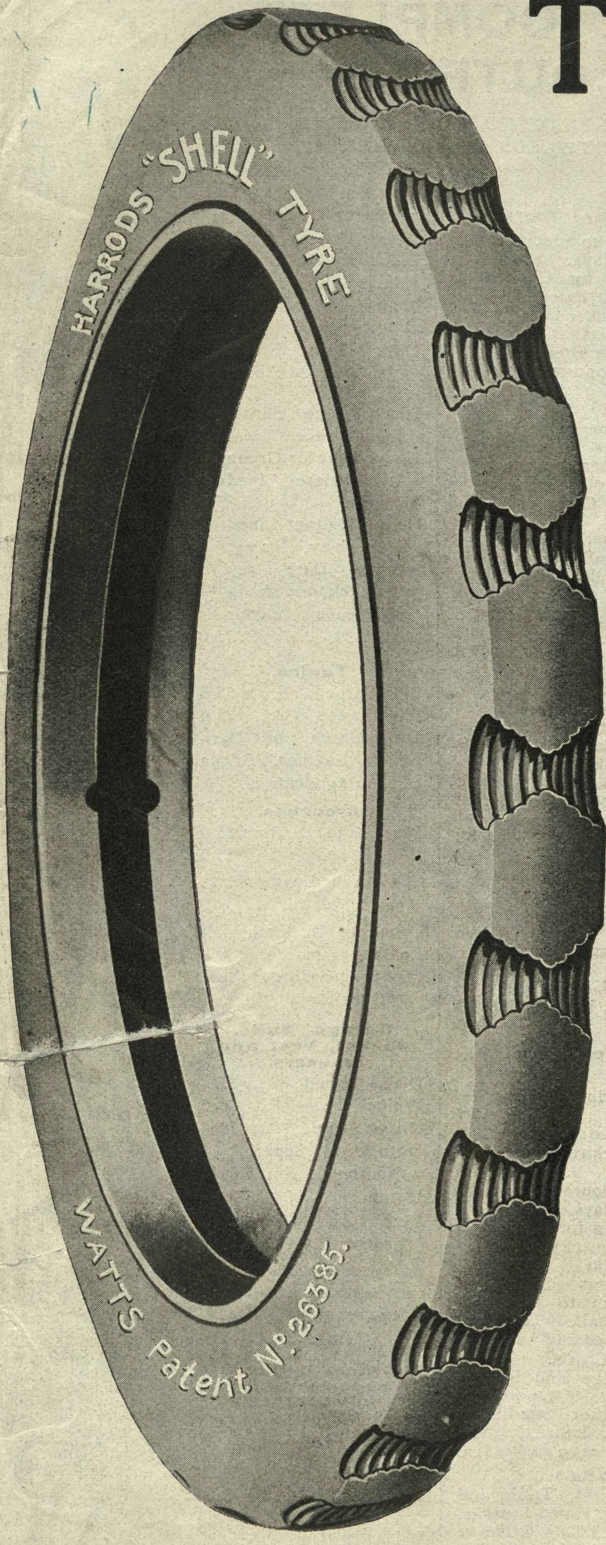
The "SHELL"

PATENT GROOVED TYRE



Excels in all that goes to make up the Ideal Tyre.

What is an Ideal Tyre?

If, as an experienced and unbiassed motorist, you were asked to enumerate the qualities essential in a Motor Tyre, they would most probably be:

Quality & Durability The rubber used is the finest possible for the purpose, toughened under a special process, and affording remarkable resistance to flints, nails and abrasive road surfaces. The "casing" is of finest closely-woven Egyptian cotton. Seven layers of this fabric go to make up the casing; between each layer an appreciable quantity of rubber is cleverly imposed integrally, affording great strength to the foundation, minimising the possibility of "rotting" and affording marked resiliency to the tyre when in use.

Efficiency The design of the "Shell" patent groove is obviously far ahead of the hitherto most popular plain groove, for the "Shell," unlike the plain groove, is designed to grip ALL ways without loss of engine-power through suction or friction; while its wide open-ended grooves keep it cooler than even a plain tread.

Economy Their remarkably low price is arrived at by the simple addition of a reasonable working profit to the actual cost of manufacture—nothing more. The buyer of "Shell" Tyres thus gets value for money every time. The prices of "Shell" Tyres will be found about 25% below those of any other high-grade tyre. Whatever the prices ruling on the rubber market, or at whatever price "Shell" Tyres may be, there will positively be no lowering of the "Shell" high standard of quality. On the other hand, Harrods' constant endeavour will be its improvement in every possible respect.

Manufacture "Shell" Tyres are specially manufactured for Harrods by the Avon Rubber Co., of Melksham, Wilts., one of the oldest and most reputable firms in the rubber trade in this country.

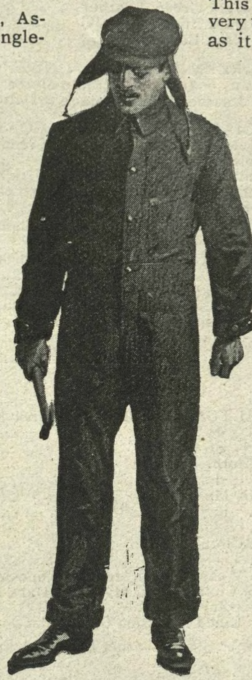
CHAMOIS LEATHER VEST.



THE AEROSMOC.

THE "AEROSMOC," THE MOST PRACTICAL SUIT YET DESIGNED.

☛ It is a windproof and waterproof garment on novel lines which will be greatly appreciated by aeroplanists and drivers of racing cars.

It is, first of all, a working overall giving complete protection to one's ordinary clothing, whilst allowing absolute freedom of action in all directions.

It is of stout double-texture material to withstand the "rough-and-ready" treatment met with in general overhauling. For driving, an ideal suit is at once ready without the necessity of the usual change; one has just to tighten the lower part of the trouser legs puttee-fashion, fastening them with the buckled strap at the bottom of trousers (which, when the suit is doing duty as a working overall, are turned up, concealing and carrying the aforementioned strap). A band at the wrist is then tightened (elastic cuffs are fitted), and the garment is ready for driving in. In stock in Brown Showerproof Twill, 10/6; Cap (extra) 5/6.

CUSTOMERS of HARRODS' TAILORING DEPARTMENT obtain the very best style of Tailoring without having to pay exorbitant prices. That in a nutshell is the foundation of the widespread success achieved by this important section.

Our Customers are gentlemen moving in the best circles, who are sound critics of clothes and what they should be, and their consistent patronage is an unique testimonial for real merit. To meet the convenience of Customers living at a distance, the detailed illustrations are arranged with a letter and number underneath, and, with the assistance of our Self-Measurement Form in the front of this book and patterns, a selection can be made with as much ease as could be afforded by a personal visit. The particulars of every Order, together with measures and paper pattern, are registered for future reference when re-ordering.

SPECIAL DEPARTMENT FOR GENTLEMEN'S CLOTHING READY TO WEAR.

FOR LADIES' AND GENTLEMEN'S SPORTING WEAR THE BEST AND MOST SERVICEABLE MATERIALS ARE

Canterbury Homespuns

Canterbury Homespuns were originally made by the Huguenots, and the industry has lately been revived by The Canterbury Weavers, Ltd., with marked success. The Homespuns are woven on hand-looms from pure Kentish Wool. They are beautifully soft, and make-up perfectly. The shades, too, are artistic and delightful, and particularly becoming for Sporting wear.

HARRODS stock a large and varied selection of these Tweeds. Please send for patterns, asking for price per yard, and stating whether for Gentlemen's Suits or Ladies' Costumes.

When ordering your next Suit or Costume, ask to see

GENTLEMEN'S READY-TO-WEAR TAILORING

AN OLD PREJUDICE TRANSFORMED INTO A MODERN PREFERMENT.

Harrods achieve remarkable success in "Tailoring Ready-to-Wear," and devote a large Department to it. Its products are distinguished by quality and style. Its Ready-to-Wear Departments have raised the standard of Ready-to-Wear Clothes in this country to such a degree that it has become a popular custom with Gentlemen to obtain outfits on the spot, without going through the usual routine associated with made-to-order tailoring.

Our large and varied range of patterns and styles, together with our revised scale of sizes, enables us to fit any figure whether short, stout, normal or tall, the fit being in every way equal to made to measure. The same result can be obtained by post, all that is necessary being a statement of height and chest measurements.

Every suit sold by Harrods is cut by a first-class tailor, and receives the same attention all through as though made to a special and individual order. Its absolute success in fit is due to the fact that Harrods stock five different fittings to each chest and waist measurement, and experience proves that this range meets the wants of every man of normal dimensions.

Harrods hold large ready-to-wear selections in Flannel, Tweed and Blue Serge Lounge Suits for Gentlemen, as well as the largest stock in London of Overcoats and Travelling Ulsters.

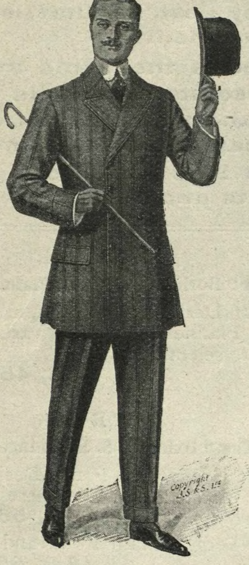
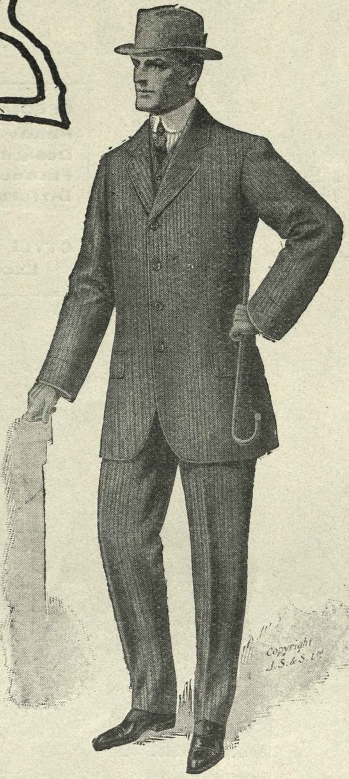
IMPERIA CLOTHING

"IMPERIA" CLOTHING



THESE SERVICEABLE IMPERIA SUITS AND OVERCOATS ARE STOCKED IN A WIDE RANGE OF PATTERNS BY HARRODS.



Imperia Clothing is high grade ready-to-wear tailoring at a moderate cost, and has rapidly made its way in public favour because of its general air of superiority—it must not be confused with the hitherto usual run of ready made clothes—it is something infinitely superior. It has a distinguished cut and finish such as are usually associated with the finest West End tailoring. Every garment is made from specially selected fabrics that are guaranteed reliable and durable.

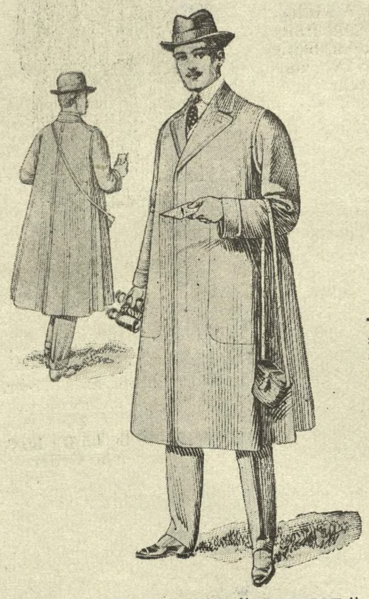
Typical Examples of the Excellence of Harrods' Tailoring. THE "RAYNFRE" COAT.

SPÉCIALITÉ RAINCOAT.

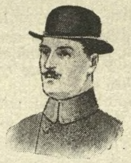
THE "RAYNFRE" COAT. (Reg. No. 311,787).

Harrods have produced in the "Raynfre" a fashionable and serviceable Coat combined, at an economical price. For the man who desires protection against the uncertainties of our climate—who wants comfort and smartness, and who appreciates the highest class of tailoring, it is the ideal coat. The cloth is a fine quality rainproof material (exclusively made for Harrods), which will stand the severest test of weather. It is impervious to wet, but is self-ventilating at the same time, thus ensuring immunity from stuffiness.

Cut as a good raincoat should be, it has nice easy-fitting shoulders and a full skirt, which allows it to be easily slipped on and off. A superfine Italian cloth lining adds warmth, but practically nothing in weight.



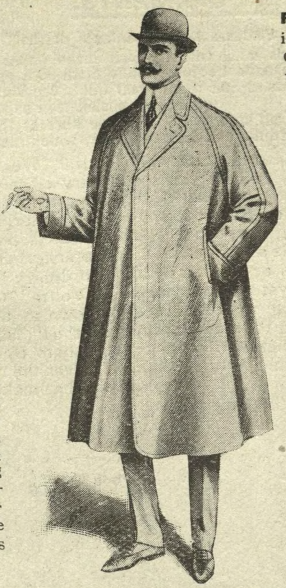
Style No. T R 1964. The "RAYNFRE."



Showing "RAYNFRE COAT" fitted with PATENT "PRESTO" COLLAR.

The "Raynfre" when fitted with the "Presto" Patent Convertible Collar, an ingenious device which provides for the Coat Two Collars in one, without in any way interfering with the fit or appearance of the Coat.

The fitting of the "Presto" Collar is **5/0** extra.



Style No. T R 1965. The "RAYNFRE," with Talma Sleeves.

THE "RAYNFRE" COAT (Regd.) is Harrods' exclusive creation, and is made by their own tailors. Indispensable for Town, Country, and all travels, race meetings, golfing, shooting, etc., they are invaluable and most serviceable. Made in 24 different designs and shades, 46 inches long, and all sizes from 34 to 44 in. chest. Height and chest measurement only necessary when ordering.

"YELTRA" YARNPROOF WEATHER GARMENTS.

A Few Brief Features and Advantages of the "Yeltra" Yarnproofed Weathercoats.

The Sports Model is made with Prussian shape Collar and buttons to neck; it is cut with Pivot Sleeves that give absolute freedom; Cuffs fitted with patent fastener and storm strap. The Skirt comes below the knees and is cut very full. The Vertical Pockets are cut through so that the undercoat pockets can be reached easily.

The Town Model is cut on precisely the same lines as the Sports Model, with the exception that it has lapel fronts and ordinary collar, which makes it serviceable for Town Wear.

"Yeltra" Cloths, from which all "Yeltra" Weatherproof Garments are tailored, are made from finely twisted yarns and very closely woven. The yarns or threads are also treated with our special triple yarnproof process, which permeates every fibre of the cloth, and when finished renders the material perfectly rainproof while retaining its self-ventilating properties. The cloth is non-absorbent, and the result of this treatment presents a full and rich appearance. This method of proofing also obviates the disadvantages associated with the ordinary Macintosh—the cloth is pliable, comfortable to wear, yet much stronger. "Yeltra" Garments are made lined or unlined, and when lined the material used is known as a Two Strand Wool Combine Lining, which is treated in the same manner as the "Yeltra" Yarnproof Cloths. The utility of "Yeltra" Garments will appeal strongly to Sportsmen, Motorists and others, being suitable for town and country alike. It gives the required comfort demanded by "outdoor" men, yet has a smart appearance that makes it "correct" for town wear.

PESCO
UNDERWEAR

The textures in which "Pesco" is made are so numerous and varied that there is no Season in the year, and no climate in the world, for which "Pesco" is not adapted. The "Pesco" ranges graduate from gossamer thinness to 6-ply thickness—for the tropical heat or Arctic cold—for wear in the east, in the west, the north or south, or at home in the best or the worst of weathers. Each and all of these "Pesco" textures (always Pure Wool or Silk and Wool throughout) can be obtained in every Underwear shape and size, for Ladies, Gentlemen and Children, at moderate prices only. The "Pesco" mark, without which none is genuine, guarantees to replace free any garment that shrinks in washing.

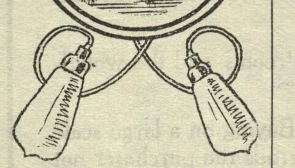
Harrods' Furniture Showrooms are worthy of attention from everyone who desires to furnish artistically and economically. They contain enormous stocks of high-class Furniture of every period, design and price, old and modern furniture, conventional patterns, and models exclusive to Harrods.



If you wish to furnish an entire house Harrods have in their Showrooms model homes, furnished throughout and so arranged that their actual effect is at once apparent to the enquiring visitor. Mansion or maisonette, country house or town flat, all can be furnished suitably and completely from Harrods' Showrooms.

In the Furnishing Section are also included magnificent Departments for Carpets, Furnishing Fabrics, China and Glass, Ironmongery, Turnery, Pianos, Pictures, Building Requirements, &c.

FURNITURE DEPARTMENT

SWIFT and steady growth has marked the history of Harrods' furniture department—and not without reason. For Harrods' policy in the matter of furnishing, as in everything else, is the one policy which always succeeds in not only winning, but holding customers—the policy of selling sound, satisfactory wares at reasonable prices. After all furniture is not bought to be used once and thrown away, nor is it changed from year to year. It is bought to endure sound and strong, not only for the lifetime of the purchaser, but as an heirloom. So that one of the most elementary requirements of furniture is that it should be built to last, and that is a quality which involves many things.

Take the question of upholstery leather, for example. Leather **can** be tanned in a comparatively short time by the aid of chemical treatment, but it is easy to see the inferiority of hides thus treated to those which are tanned in the good old slow way, and it makes all the difference in the life.

Or the matter of timber. There is not much difference outwardly between a well-seasoned oak and one that is but half seasoned. The difference becomes apparent when the furniture that is made from it has had a year or two's wear, when the frames begin to crack and warp.

Fabrics too. A particular weave of tapestry is more suitable for one kind of furniture than another. This sort of linen is stronger than that, for pieces that have to stand heavy wear. It is knowledge of little points like this that counts in the making of perfect furniture.

The fillings of chairs and sofas are also matters of great importance. "Horsehair-stuffed" may mean anything according to whether the term is used by a maker who employs the first hair that comes along, short, broken, untreated, or by one who only employs the proper long hairs, duly teased and curled, the only hair that gives the true horsehair resiliency.

But it is not materials only that must be of the best; without practical skill and conscientious workmanship the best materials are wasted. What is needed is the loving hand of the craftsman, who, imbued with all the inherited skill of generations, takes a legitimate pride in his work, who spends as much care upon the perfection of the parts that do not show as upon those which are patent to the eye. There must be no scamping, no cutting down of work in the hidden parts, if furniture is to stand the test of time. The only safeguard for the purchaser that his furniture **will** stand that test, is to be found in dealing with a firm whose pieces have been **tested** and **proved** by half a century's experience.

There are few occupations so fascinating as choosing furniture, whether it be displayed in a showroom or illustrated in a catalogue. But to obtain the highest satisfaction, the purchaser should deal with a house which has a wide selection to offer. There is hardly anything so annoying as to be compelled to take something which is not quite the right thing, because it is nearest to one's ideal that the shop can offer; they will **get** what is wanted, of course, but—it is not the same thing.

Harrods' stock is an enormous one, displayed in acres of showrooms and model furnished rooms, and the would-be purchaser who cannot satisfy himself there must be hard to please indeed.

Inevitably bound up with the question of stock is the question of price. Buying on a large scale always renders it possible to buy at a low price in the best market, so that by dealing at Harrods the purchaser not only has a very large selection to choose from, but he can furnish at a very much lower cost than would be involved in dealing with smaller establishments.

Luxuriously Furnished Flats at Harrods' on View.

In addition to the large, well-lighted showrooms, there are completely furnished flats and rooms where the effects attained by particular pieces are seen to advantage.
